users simultaneously. Faculty members can use Yaksh to evaluate their students.

4. Teaching faculty

- **Prof. Prabhu Ramchandran**, Co-Principal Investigator, FOSSEE project
- **Python Team members**, FOSSEE, IIT Bombay

5. Course Fee

Every participant has to pay Rs. **100** as the course fee to IIT Bombay at the time of online registration. On the day of the workshop, i.e., on **22 June 2019**, they have to pay Rs. **400** to the Remote Centre that they would be attending, to defray the cost of organising the workshop, lunch, and coffee/tea. Please note that the registration fee once paid is neither refundable nor adjustable under any circumstances.

6. Who should attend?

As this workshop is not subject-specific, teaching faculty from all domains (engineering, sciences), and polytechnic colleges, and PGT of schools, can attend. Teachers registered in a Masters or a PhD programme, during their employment as a teacher, can also participate.

7. Criteria for issuing Certificates

E-certificate will be provided to the participants after successful completion of the workshop and filling up the feedback form.

8. Duration and Venue

The workshop will be conducted on Saturday, **22 June 2019** from **9.30 AM to 6.00 PM** at Remote Centres of IIT Bombay. This workshop will be conducted through a blended mode, using both live video conferencing facility (A-VIEW) and hands-on sessions using Spoken Tutorials. A detailed workshop schedule will be available soon.

9. How to apply?

Enrollment will be strictly online, and no other mode of application will be entertained. **The last date of registration is 20 June 2019, 12.30 pm.** The URL for registration is: <http://www.it.iitb.ac.in/tmeict/announcements.html>

Register on the Spoken Tutorial Website:

1. Before the workshop, participants should register on <https://spoken-tutorial.org/>
2. Fill up the registration form and submit.
3. An email will be received.
4. The account should be activated by clicking the link in the email.
5. The Username and Password should be noted. This is an extremely important step.
6. One needs the above information to post questions on the forum, which will be explained at the time of the workshop.

Note

- Neither IIT Bombay nor the Remote Centre will bear the travel expense of the participating representatives. There shall also be no accommodation provided to the participants.
- All participants are required to bring **ear phones**, as they will have to listen to video tutorials. Without ear phones, the workshop will not at all be effective.
- Computers to practise Spoken Tutorials and to do Python programming will be available at the Remote Centres. But if they wish, participants can bring their own laptops with Python installed.

10. Prerequisite for the Python Workshop

The attending participants must see the **Introduction to Python video** before the workshop.

Introduction

Bombay has conducted many large-scale teacher training workshops under the Train 10,000 Teachers (T10KT) programme, sponsored by the National Mission on Education through ICT (NMEICT), MHRD, Govt. of India, and trained over 2,00,000 teachers.

Another successful technology developed at IIT Bombay is Spoken Tutorial, using which about 50 lakh students have been trained on various ICT topics. The effectiveness of this method can be seen from the testimonials available here: <https://spoken-tutorial.org/testimonials/media/?foss=70> and TEDx talk. The Spoken Tutorial project is also implemented successfully at IIT Bombay, with funding from NMEICT, MHRD.

It is now proposed to offer the highly effective Spoken Tutorial based ICT training to a large number of teachers, across the country, through the T10KT methodology, with Python training being taken up next.

Python is a very versatile and easy-to-learn programming language with an extensive library of open tools allowing users to solve a variety of problems. Python has a rich ecosystem of libraries and tools for scientific computing and data science. There are libraries that provide a powerful interactive computing environment both on the console as well as on a web-browser. Python can interface relatively easily with other well-established languages like FORTRAN/C and C++. In addition to this Python also has libraries to build user interfaces, build web applications, interface to hardware, and a wide host of other domains. This makes Python an excellent language to learn opening up a world of possibilities to users who desire to use their computers more effectively.

FOSSEE (Free/Libre and Open Source Software for Education) project at IIT Bombay (<https://fossee.in>) has been promoting Python, and other FOSS software, such as Scilab, OpenFOAM, eSim, Osdag, OpenModelica, DWSIM & R, and Open Source hardware, such as Arduino and OpenPLC. FOSSEE is also funded by NMEICT, MHRD. Government of India has mandated the use of open source software.

The Python workshop is organised by the Teaching Learning Centre (TLC) at IIT Bombay, funded by the Pandit Madan Mohan Malaviya National Mission on Teachers and Teaching (PMNMTT), MHRD, Govt. of India. As Spoken Tutorial mode offers hands on practice, with 100% active learning,

those who undergo this training will be able to start using Python immediately after the workshop. They will also be able to conduct Python workshops for their students, using Spoken Tutorials, on their own, without requiring any help from anyone else.

The one day Python workshop will be conducted on **Saturday, 22 June 2019**, through select Remote Centres of IIT Bombay. This will be a blended training programme that uses A-VIEW for live interactions and Spoken Tutorials to learn to use Python. The medium of instruction for this workshop is English.

2. Methodology of the Large-scale Workshop

It will be a **one day workshop, on 22 June 2019**. All participants will have to go to their chosen Remote Centre. They will learn Python through Spoken Tutorials, with help from Coordinators, already trained for this purpose by IIT Bombay. As the learning will happen only through carefully designed Spoken Tutorials, designed and developed at IIT Bombay, the quality of learning will be very high. All the participants, from all the Remote Centres, will be able to interact with the Python team at IIT Bombay, ask them questions, etc., through the video conferencing software A-VIEW and a timed discussion forum. There will be about 4 hours available for Python training and 2 hours for interactions.

3. Outline of the workshop

The workshop will have two parts:

- (a) About 3.5 hours will be used in Learning Python from Spoken Tutorials.
- (b) About 30 minutes will be used to learn about the excellent Python content, developed by FOSSEE.

3 (a) Learning Python from Spoken Tutorials

Depending on the level of the user, one can learn any/all of the topics mentioned below. If one cannot complete all the topics, one can complete them later on, through self-learning, as all required Spoken Tutorials are freely available.

Getting started: Getting started with IPython, Using plot commands interactively, Embellishing a plot, Saving plots, Multiple plots, Subplots, Additional features of IPython, Loading data from files, Plotting data, Other types of plots, Plotting charts.

Basic Level: Getting started with lists, Getting started with for, Getting started with strings, Getting started with files, Parsing data, Statistics, Getting started with arrays, Accessing parts of arrays, Image manipulation using arrays, Basic matrix operations, Advanced matrix operations, Least square fit, Basic datatypes and operators, Sequence datatypes, Input-Output, Conditional statements, Loops, Manipulating lists, Manipulating strings, Getting started with tuples, Dictionaries, Sets, Getting started with functions.

Intermediate Level: Advanced Features of Functions, Using Python Modules, Writing Python Scripts, Testing and Debugging, Error and Exception Handling.

3 (b) Useful Python content developed by FOSSEE

A significant issue with the acceptance of open source software on a large scale by academia is due to the lack of documentation. We had proposed and implemented a novel/unique approach to solve this problem through the Textbook Companion (TBC). The Python TBC is a repository of solved examples from standard Engineering and Science textbooks coded using Python. More than 500 standard engineering textbooks now have TBCs available. The solved examples are available in the form of Jupyter notebooks. There are over 4000 such notebooks available. These notebooks can be explored online or downloaded for free. Students and faculty from various parts of the country have created this collection.

One may use the Python TBC (1) to understand the steps of examples (2) to do what if studies by changing parameters. Python TBC are available at

<https://tbc-python.fossee.in/completed-books/>, absolutely free of cost. Python TBC is also hosted on the cloud.

Yaksh is also developed by FOSSEE, it is a free and open-source online evaluation software. It allows teachers to create full blown courses with video and/or markdown text-based lessons but with *Problem-based learning* at its core, Yaksh focuses on letting teachers create real-time evaluated practice exercises and quizzes. With a large array of question types like Multiple choice question, Fill-in-the-blanks, Arrange options in correct order, Assignment uploads and programming questions available, Yaksh supports Python, C, C++, Java, Bash and Scilab programming languages. Yaksh is designed to be easily deployable, and can scale-up to accommodate 500+

Report on One Day Hands on Workshop on "Python Workshop for Teachers and Research scholars" on 22-06-2019

Subject: Joginpally B.R Engineering College conducting A One Day Workshop on "Python Workshop for Teachers and Research scholars" on 22-06-2019 regarding.

Joginpally B.R Engineering College conducted one day workshop on "Python Workshop for Teachers and Research scholars" for teacher on 22-06-2019 in associate with **Teaching Learning Center, IIT Bombay**, funded by the Pandit Madan Mohan Malaviya National Mission on Teachers and Teaching (PMMMNMTT), an initiative of the Ministry of Human Resource Development, Government of India. In this workshop, faculty members are participated and practiced the hands on experience on python program. Course coordinators interacted with the participants live through video conferencing software A-VIEW. There was about 4 to 5 hours available for Python training and two hours for interactions. Python is a very versatile and easy-to-learn programming language with an extensive library of open tools allowing users to solve a variety of problems. Python has a rich ecosystem of libraries and tools for scientific computing and data science. This workshop is organized by the faculty of P Veernath, Assoc. Professor and Department of ECE. Total numbers of participant's are 16.

5. Course Fee

Every participant has to pay Rs. 100 as the course fee to IIT Bombay at the time of online registration. On the day of the workshop, i.e., on 4 May 2019, they have to pay Rs. 400 to the Remote Centre that they would be attending, to defray the cost of organising the workshop, lunch, and coffee/tea. Please note that the registration fee once paid is neither refundable nor adjustable under any circumstances.

6. Who should attend?

As this workshop is not subject-specific, teaching faculty from all domains (engineering, sciences), and polytechnic colleges, and PGT of schools, can attend. Teachers registered in a Masters or a PhD programme, during their employment as a teacher, can also participate.

7. Criteria for issuing Certificates

E-certificate will be provided to the participants after successful completion of the workshop and filling up the feedback form.

8. Duration and Venue

The workshop will be conducted on Saturday, 4 May 2019 from 9.30 AM to 6.00 PM at Remote Centres of IIT Bombay. This workshop will be conducted through a blended mode, using both live video conferencing facility (A-VIEW) and hands-on sessions using Spoken Tutorials. A detailed workshop schedule will be available soon.

9. How to apply?

Enrollment will be strictly online, and no other mode of application will be entertained. The last date of registration is 30 April 2019, 12.30 pm. The URL for registration is: <http://www.it.iitb.ac.in/nmeict/announcements.html>

Register on the Spoken Tutorial Website:

1. Before the workshop, participants should register on <https://spoken-tutorial.org/>
2. Fill up the registration form and submit.
3. An email will be received.
4. The account should be activated by clicking the link in the email.
5. The Username and Password should be noted. This is an extremely important step.
6. One needs the above information to post questions on the forum, which will be explained at the time of the workshop.

Note

- Neither IIT Bombay nor the Remote Centre will bear the travel expense of the participating representatives. There shall also be no accommodation provided to the participants.
- All participants are required to bring ear phones, as they will have to listen to video tutorials. Without ear phones, the workshop will not at all be effective.
- Computers to practise Spoken Tutorials and to do Scilab programming will be available at the Remote Centres. But if they wish, participants can bring their own laptops with Scilab installed.

10. Prerequisite for the Scilab Workshop

You must see the four short videos given by Prof. Kannan Moudgalya about Scilab and its benefits.

1. Introduction

IIT Bombay has conducted many large-scale teacher training workshops under the Train 10,000 Teachers (T10KT) programme, sponsored by the National Mission on Education through ICT (NMEICT), MHRD, Govt. of India, and trained over 2,00,000 teachers.

Another successful technology developed at IIT Bombay is Spoken Tutorial, using which about 50 lakh students have been trained on various ICT topics. The effectiveness of this method can be seen from the testimonials available here: <https://spoken-tutorial.org/testimonials/media>. The Spoken Tutorial project is also implemented successfully at IIT Bombay, with funding from NMEICT, MHRD.

It is now proposed to offer the highly effective Spoken Tutorial based ICT training to a large number of teachers, across the country, through the T10KT methodology, with Scilab training being taken up next.

Scilab is a Free/Libre and Open Source Software (FLOSS), created mainly for numerical computations. It uses the state of the art numerical libraries, such as LINPACK, EISPACK and LAPACK, and hence, its results are highly reliable. Scilab implements the user friendly language, similar to the one used in the popular software Matlab. But unlike Matlab, Scilab can be freely downloaded, freely copied, freely modified and also freely distributed. Naturally, Scilab can be used absolutely free of cost, unlike Matlab, which can be extremely expensive, especially to the industry. Scilab comes with a graphical programming interface Xcos, which is similar to Simulink. A good knowledge of Scilab will help improve the employment potential of your students.

The FOSSEE (Free/Libre and Open Source Software for Education) project at IIT Bombay (<https://fossee.in>) has been promoting Scilab, and other FLOSS software, such as Python, OpenFOAM, eSim, Osdag, OpenModelica, DWSIM & R, and Open Source hardware, such as Arduino and OpenPLC. FOSSEE is also funded by NMEICT, MHRD, Government of India has mandated the use of open source software.

The Scilab workshop is organised by the Teaching Learning Centre (TLC) at IIT Bombay, funded by the Pandit Madan Mohan Malaviya National Mission on Teachers and Teaching (PMNMNTT), MHRD, Govt. of India. As Spoken Tutorial method offers hands on practice, with 100% active learning, those who undergo this training will be able

to start using Scilab immediately after the workshop. They will also be able to conduct Scilab workshops for their students, using Spoken Tutorials, on their own, without requiring any help from anyone else.

The one day Scilab workshop will be conducted on **Saturday, 4 May 2019**, through Remote Centres of IIT Bombay. The medium of instruction for this workshop is English. Language dubbed Spoken Tutorials in Hindi and a few other languages will also be available.

2. Methodology of the Workshop

It will be a one day workshop, on 4 May 2019. All participants will have to go to their chosen Remote Centre. They will learn Scilab through Spoken Tutorials, with help from Coordinators, already trained for this purpose at IIT Bombay. As the learning will happen only through carefully designed Spoken Tutorials designed and developed at IIT Bombay, the quality of learning will be very high. All the participants, from all the Remote Centres, will be able to interact with the Scilab team at IIT Bombay, ask them questions, etc., through the video conferencing software A-VIEW. There will be about 4 hours available for Scilab training and 2 hours for interactions.

3. Outline of the workshop

The workshop will have two parts:

- About 3.5 hours will be used in Learning Scilab from Spoken Tutorials.
- About 30 minutes will be used to learn about the excellent Scilab content, developed by FOSSEE.

3(a). Learning Scilab from Spoken Tutorials

Depending on the level of the user, one can learn any/all of the topics mentioned below. If one cannot complete all the topics, one can complete them later on, through self-learning, as all required Spoken Tutorials are freely available.

Basic level: Getting started with Scilab, Vector Operations, Matrix Operations, Conditional branching, Iterations, Scripts and Functions, Plotting 2D graphs, Introduction to Xcos.

Intermediate level: File handling, User defined input and output, Integration, Solving non-linear equations,

Linear equations - Gaussian methods, Linear equations - Iterative Methods, Interpolation, ODE Euler methods, and ODE Applications.

Advanced level: Optimization Using Karmarkar Function, Digital Signal Processing, Control systems, Discrete systems, Calling User Defined Functions in Xcos, and Simulating a PID controller using Xcos.

3(b). Useful Scilab content developed by FOSSEE

A major problem with open source software is the lack of documentation. A solution to this problem is the Textbook Companion (TBC). A Scilab TBC is a collection of Scilab code for all solved examples of standard textbooks. The FOSSEE team has coordinated the creation of Scilab TBC for 600 books in science and engineering, all branches, with Scilab code for about 75,000 examples. Such a large collection is not available for any other software, including commercial ones. Students and faculty from various parts of the country have created this collection. FOSSEE provides a handsome honorarium to any one who creates TBC.

One may use the Scilab TBC (1) to understand the steps of examples (2) to do what if studies by changing parameters (3) to locate the syntax for a command and (4) to locate all examples that use a particular command, and so on. Scilab TBC are available at <https://scilab.in/Completed Books>, absolutely free of cost. Scilab TBC is also hosted on the cloud.

The FOSSEE Team also helps colleges migrate their labs to Scilab. This allows colleges that cannot afford Matlab to run their labs with Scilab. Codes of migrated labs are available at https://scilab.in/lab_migration/completed_labs.

The FOSSEE Team has also developed a few useful toolboxes, available at <https://scilab.in/fossee-scilab-toolbox>. We invite talented people to join us in improving these toolboxes and to develop new toolboxes. We have also created a cloud version of Xcos and 130 Xcos examples that can run on this cloud. Depending on the time available, one can try out all of the above.

Report on One Day Hands on Workshop on "Scilab" on 04-05-2019

Subject: Joginpally B.R Engineering College conducting A One Day Workshop on "Scilab" on 04-05-2019 regarding.

Joginpally B.R Engineering College conducted one day workshop on "Scilab" for teacher on 04-05-2019 in associate with **Teaching Learning Center, IIT Bombay**, funded by the Pandit Madan Mohan Malaviya National Mission on Teachers and Teaching (PMMMNTT), an initiative of the Ministry of Human Resource Development, Government of India. In this workshop, faculty members are participated and practiced the hands on experience on python program. Course coordinators interacted with the participants live through video conferencing software A-VIEW. There was about 4 hours available for scilab training and two hours for interactions. Scilab is a Free/Libre and Open Source Software (FLOSS), created mainly for numerical computations. This workshop is organized by the faculty of P Veernath, Assoc. Professor and Department of ECE. Total numbers of participants are 35.

Venue : Placement Cell, Room No.234 at Joginpally B.R Engineering College.

R&D CELL and IIC Organizing

PROJECT EXPO -2019

The objectives of Project Expo which was started in the year 2019 with an exceptional idea to showcase the research talents, Innovativeness, creativity of all B.Tech students.

Prototype projects on recent societal issues with respect to better efficiency and low-cost product has been encouraged to the students. It is a platform to promote multidisciplinary research among all students.

The main aim or purpose for conducting such a program is to enhance the knowledge of student and motivate them to compete in the global competitive engineering field.

Develop professionals having good skills, self-learning ability and confidence to support and contribute to the growth of relevant industries.

This provides opportunity for the students to demonstrate their learning experience.

Report

Webinar presentation on IPR Workshop conducted by MHRD Innovation Cell- Institutions Innovation Council (MIC-IIC) on 10th January 2019

The workshop was conducted in two sessions; morning session by a local expert by a central expert (Dr. Shwetasree Majumdar, Principal, FIDUS Law Chamber). Both sessions are covered different topics, including history of IP, filing patent/copyright/design application and entrepreneurship etc. This is important for students and faculty members of JBREC.

PCB FABRICATION WORKSHOP

Date:- 29-08-2018 to 30-08-2018

Year: 2018-19

Date:- 26-10-2018

CIRCULAR

Joginpally B.R Engineering College is going to conduct the Two Days workshop on “**PCB FABRICATION**” on 29th and 30th October 2018 in collaboration with **AMTRONICS** for Teachers and III year & IV year students of Department of ECE in Placement Cell at JBREC. HOD is requested to inform the faculty members and students to participate

PCB FABRICATION WORKSHOP

Dates : 29th & 30th October 2018

ENVISAGED COVERAGE:

- › Designing PCB in KICAD
- › Fabricating PCB with different types of applications
- › Knowledge of different types of tools and components
- › Hands on Experience and Industrial Exposure.
- › Learn & Interact with renowned Industry Experts.

TAKE AWAYS:

- › PCB board done by them.
- › Certificate of participation
- › Softcopy developed by well-established Industry experts
- › All the necessary software & Hardware would be provided for the workshop purpose.

REPORT

Subject: Two day Workshop on "PCB Design" on 29th and 30th October 2018 regarding.

This is hereby informed that The Department of ECE conducted Two days Workshop on "PCB Design" on 29th and 30th October 2018 at Joginpally B.R Engineering College. In this workshop, ECE III & IV B.Tech Students and ECE faculty members are participated. This workshop is Conducted by Armotronix and organized by the faculty of Prof. M.Srinivasa Rao, HOD, E.Mahesh, Asst.Professor and G Saibabu, Asst.Professor, Department of ECE. Total numbers of participants are 120.

Thanking you sir.

Venue: Placement Cell & EDC Lab, Joginpally B.R Engineering College.

Resource Person: B.Kishore Kumar, Director of Armotronix

Convener: Prof. M.Srinivasa Rao, HOD

Organizers: 1. E.Mahesh, Asst.Professor
2. G Saibabu, Asst.Professor

Workshop Benefits:

Hands on Designing and Manufacturing of PCB boards which covers all the basics of electronics and the working principles. This workshop is useful in the future while doing their academic projects or any scientific research in the college.

Details:

Eligibility: All students from the branches ECE, EEE, EIE and ECM can attend this workshop

Venue: Your College Campus

Schedule: Two Consecutive Days

Our Requirements for Workshop:

- Minimum number of participants is 60.
- LCD projector
- Lab/Auditorium/ Class room with sufficient computers for students.
- PA (Microphone and Speaker) system for the room.

Take Away by Participants:

- ✓ Learn & Interact with renowned Industry Experts.
- ✓ Receive an unparalleled education on the art of PCB designing with personal one-on-one attention.
- ✓ Covers all the basics of PCBs.
- ✓ Softcopy developed by well-established Industry experts (**through E-mail**).
- ✓ Hands on Experience of Latest PCB Techniques & Tools. All the necessary software & Hardware would be provided for the workshop purpose.
- ✓ **1 Take Away PCB board done by them.**
- ✓ **Certificate of participation**

Duration:

It is a workshop of duration 16 hrs. We require two consecutive days to conduct this workshop each day of duration 8hrs.

Note: Certificate of participation will be provided for the attendees in all the above workshop.

About PCB Design

A printed circuit board, or PCB, is used to mechanically support and electrically connect electronic components using conductive pathways, tracks or signal traces etched from copper sheets laminated onto a non-conductive substrate. Today printed circuit boards are used in virtually all but the simplest commercially produced electronic devices, and allow fully automated assembly processes that were not possible or practical in earlier era tag type circuit assembly processes. Consumers are driving industry growth with a desire for cool products. Great technology is no longer enough to differentiate a product. It must be squeezed into a "cool" package in order to sell. This has an effect on everything inside the box -- including the PCB, the chips and what's packaged on the chips.

Workshop on PCB Designing & Fabrication:

Students end up spending upto 50 % of their project development time and money due to improper electronic component selection using trial & error method for their minor & major projects.

This Workshop is dedicated in training the students on the design and manufacturing of a Printed Circuit Board. This workshop is an invaluable resource for those who are learning PCB design. Designing a PCB is not something you will do in a couple of hours. It is a highly technical learned skill that will take years to master. The Workshop will provide the basics of PCB design as well as more advanced topics.

This is a two day program which focuses on advanced topic of PCB design along Fabrication process. In day one each participant will design PCB layout using KI-CA D software, In day two they will involve in etching process on a laminated copper sheet provided to them, they will also under go for drilling process using a Hand driller and finally assembling and soldering the electrical components onto board.

REPORT OF

A TWO DAY WORKSHOP ON ETHICAL HACKING

1. Institution : JBREC
2. Department : CSE
3. Name of Event : A Two Day Workshop on **Ethical Hacking**.
4. Event contents : The Ethical Hacking Workshop will ready students for the Information Security Industry with technical training on cyber security. Live hacking sessions will allow in-depth understanding of computer server and network systems – which is essential for formulating strategies for improved security.
5. Target Participants: 200
6. Parameters for target audience/participants:
7. Event Venue : Seminar Hall, JBREC
8. Purpose and Benefits tangible/intangible:

programme was successfully organized by **Mr.Sai Satish, CEO - Andhra Hackers** in association with Bhaskar Research Innovation Incubation Startup Center(BRIISC) on coordinated by Dr.Syed Umar, R & D Dean in CSE department, Mr.G.Narayana Associate Professor in CSE & Dr.Srikanth HOD of IT

The main objective and aim of this study is to let people know about what is ethical hacking and how they can take advantage of it to prevent from fraud regarding their hacking situations. Conceptual Framework Ethics: Ethics are the moral principles that govern a person's behavior or the conducting of an activity
